

Professional Development

The ongoing professional development of the employee as well as orientation to the identity and role of the parish is the mutual responsibility of the employer and the employee. The parish provides the climate in which professional growth and development are seen as important, and provides opportunities for staff development as deemed appropriate based on the employee's position. Employees required by the parish to attend workshops, seminars, conferences or training programs will have the cost of such programs paid from the appropriate budget. Attendance at workshops, seminars and conferences requires the approval of the immediate supervisor.
